¹ Requests for specific species are considered and are welcome. Please be sure to request well enough in advance to allow for site identification and harvest in a given year.

² G0 = Generation zero - A wild collected, local ecotype seed source, typically from a native grassland.

G1 = Generation one - Collected from plants that are grown from Generation 0 seed. An example could be a seed production plot that was established using G0 seed.

G2 = Generation two - Collected from plants that were grown from generation one seed. An example could be commercially purchased seed from a national seed vendor.

To Place An Order:

Use this form and fill in the desired amount of each species in either the "PLS Request" or the "Small Quantity Request" column depending on the amount of seed you desire.

Return this form via mail or email to the contact information listed above.

Conservation Blueprint will respond with our availability to fill you request and generate an invoice. Once the invoice is paid, we will ship the seed order.
