¹ Requests for specific species that are not listed are considered and are welcome. Please be sure to request well enough in advance to allow for site identification and harvest in a given year.

² G0 = Generation zero - A wild collected, local ecotype seed source, typically from a native grassland or prairie. Harvested responsibly and with permission.

G1 = Generation one - Collected from plants that are grown from Generation 0 seed. An example could be a seed production plot that was established using G0 seed.

G2 = Generation two - Collected from plants that were grown from generation 1 seed. An example could be commercially purchased seed from a national seed vendor.

³ PMN indicates this species is grown in a production plot where the original seed source was supplied by Prairie Moon Nursery.

To Place An Order:

Use this form and fill in the desired amount of each species in the appropriate "Request" column (Either PLS Pound or Small Quantity).

Complete this form and return it via email or mail to the contact information listed above.

Conservation Blueprint will respond with our availability to fill your request and generate an invoice. Once the invoice has been paid, we will ship your order.

The price for species requests that are 1.0 PLS lb. or greater are available on request. Reach out to discuss those seed lots and their current availability.

Listing Information:

PLS Pound' listings are available at the 1.0+ increments

Small Quantity' listings are available in 1 ounce or less increments.

While several species may no longer be available in quantities > than 1 pound, they are still available in 'Small Quantity' offerings.

A designation of 'Sold Out' means this species is not available in this weight designation category (Either >1 PLS lb. or < 1 ounce).
